MetaJure's founders are former leaders in law firms and large legal departments. Frustrated by the manual entry DMS systems that made their work more time consuming and complex, they set out to end:

- Wasted time tagging, uploading and finding documents and email
- Inefficiency of saving documents on their personal computers, and again, into a rigid central system
- Lost knowledge and ethical exposure of missing information

The MetaJure Smart Document Management System

- Automatically captures 100% of your firm's emails and documents
- Quickly retrieves the information you want with smart, powerful algorithms
- Saves you and your firm hours every week

All at an affordable price.

Behind Your Firewall or In the Cloud

With MetaJure, the Smart Document Management System, you will

Improve your

- Speed and access to experience and expertise
- Ability to scope new projects
- Work quality and best practices
- Oversight of practice groups and client teams
- Onboarding processes
- Ability to take on alternative fee projects

And, quickly

- Complete simple conflict checks
- Upload and search client data

“MetaJure is easy and cost- effective. There’s no way we could efficiently practice without it. It’s saving us hundreds of hours.”

Attorney and Legal Administrator Erin Schaden
Herring Law Group

“We have a lot of client data in our system and with MetaJure we can get our hands on things that wouldn’t even occur to lawyers using conventional methods.”

Partner James Kosa
Deeth Williams Wall

Why MetaJure is right for today’s legal firms and departments

| | Manual DMS | MetaJure |
|---|-----------------------------------|--|
| Setup & Installation | Months | 8-10 hours |
| User Training | At least 4 hours | Under 30 minutes |
| Filing Structure | Fixed, difficult to change | Self-generated; updates automatically |
| Indexing | Manual | Automated |
| Document & Email Capture | Typically less than 50% firm wide | 100% of documents and emails firm wide |
| Data Conversion | Required | Not required |
| Capability to Manage New Sources | Limited | Unlimited and automatic |
| Finding Information | Depends on user tags and uploads | Google-like search powered by smart algorithms |
| Ease of use | Complex interface | Simple, intuitive; accessible from any PC, tablet or smart phone |

How Smart Document Management works

MetaJure automatically crawls, indexes, and tags all documents, folders, and email within a firm, whether on personal computers, network drives, or other data repositories. Documents and email stored on vulnerable locations such as individual PCs are copied and centrally stored for secure retrieval. MetaJure runs behind your firewall or on a private, secure cloud hosted by LexisNexis.
